Beautiful light, hidden in plain sight.

LED tape tucks out of sight under cabinets, inside ceiling coves, along stairs, and behind shelves. You see a warm, even glow that shapes the room, not the fixture that makes it.

What is LED tape lighting?

A thin, flexible strip lined with small, efficient LEDs. Your installer cuts it to fit each run, typically mounts it in a slim aluminum channel with a diffusing lens, and connects it to a low-voltage power supply and the controls you choose. The result is custom lighting that follows the shape of your space.

Low-Voltage
Efficient 24V power

Cut to Fit
Custom lengths, every run

Dimmable
Bright task to soft glow

90+ CRI
True, natural color

One product. Every room.

Where LED tape makes a difference

Kitchens
Under-cabinet, toe-kick, glass cabinets

Bathrooms
Vanity, mirror glow, night light

Living Rooms
Ceiling coves, TV backlight

Bedrooms
Headboard glow, path light

Stairs & Halls
Step lights, handrails, baseboards

Closets & Pantries
Shelf and rod lighting

Media & Game Rooms
Color scenes, screen backlight

Shelves & Displays
Collections, bars, artwork

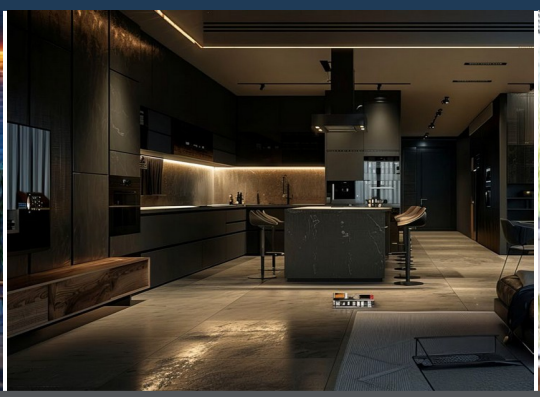

Outdoor Living*
Patios, eaves, railings

Offices & Retail
Task light, showcases, signage

**Outdoor and damp locations require wet-rated tape, channel, and connections.*

Choose your light

Five tape types, from simple white to full color

Single Color White
One fixed white. Simple, clean, and efficient for task and accent light.

Tunable White (CCT)
Adjust from warm to cool white on the same strip to suit the task or time of day.

RGB Color
Millions of colors for accents, parties, holidays, and game day.

RGB+W
Full color plus a dedicated white LED for quality everyday light.

RGB+CCT
Full color and tunable white in one strip. The most versatile choice.

Seamless, dot-free options: Lighting Leaf PhosCore™ tape produces one continuous line of light with no visible dots, even reflected in glossy counters, tile, and floors.

Set the mood with color temperature

Warmer ← → Cooler

Features, functions, and benefits

Feature	What it does	What it means for you
Slim, flexible strip	Fits under cabinets, in coves, on steps, and in tight spaces	Light exactly where you need it, with the fixture out of sight
Seamless, dot-free glow	Blends LEDs into one continuous line of light	Clean reflections on glossy counters, tile, and floors
90+ CRI color accuracy	Shows colors much the way daylight does	Finishes, food, and skin tones look natural
Dimmable and tunable	Adjusts brightness and warm-to-cool white	One room, many moods: work, relax, entertain
Indirect, reflected light	Softens glare and harsh shadows	Easier on the eyes, and rooms feel larger
Smart control	App, voice, wall remotes, scenes, and schedules	Convenience from anywhere; never come home to a dark house
Energy-efficient LED	Low wattage and long service life	Lower energy use and less upkeep

Control it your way

- Tap or speak: dim, brighten, and change color by app or smart assistant
- Stylish, removable in-wall remotes for everyday use
- Scenes for cooking, movie night, and entertaining
- Schedules and timers: wake to a gentle glow, come home to a lit house

Why a professional install?

- Power supplies sized to each run for reliable performance
- Correct wire gauge for even brightness from end to end
- Clean, concealed wiring and finished channel details
- Local support from the pro who designed your lighting
